Computer Science Engineering student specializing in AI & Machine Learning (CGPA 9.04) who learns by building. Experienced in retrieval-augmented generation, full-stack development and immersive tech; SIH 2025 national finalist, Best Performing Team at the SIH 2026 IDE Bootcamp, and a veteran of 10+ hackathons.

01 EDUCATION

B.E. Computer Science & Engineering — Artificial Intelligence & Machine Learning
Rathinam Global Deemed to be University

Expected [year]
CGPA 9.04 / 10

02 PROJECTS

RGU AI Assistant — RAG university assistant `PROTOTYPE`

- Built a conversational assistant that answers student queries from a structured institutional knowledge base using retrieval-augmented generation.
- Fixed retrieval contamination from short acronyms by adding an exact-match routing layer ahead of vector search and blending sparse (Fuse.js) with semantic (ChromaDB) retrieval.
- Added intent classification and routing, conversation-state management, and honest fallbacks when retrieval confidence is low.

Stack: TypeScript, Node.js, ChromaDB, Fuse.js, LLM APIs

SEISMORA — Portable soft-insert contouring device `SIH 2025 FINALIST` `PROTOTYPE`

- Co-developed a compact, portable device for contouring the soft inserts of 3D-printed prosthetic sockets; presented working prototypes at the SIH 2025 grand finale.

Areas: Assistive technology, hardware prototyping, product design, 3D printing

Jharkhand Safety AR — AR / VR industrial safety training `SIH 2026` `PROTOTYPE`

- Immersive safety-training system combining AR hazard identification, camera-based visual recognition and interactive VR scenarios.

Stack: Python, FastAPI, computer vision, AR/VR

APHELION AI — Space-weather intelligence platform `IN DEVELOPMENT`

- Modular pipeline analysing solar X-ray data (SoLEXS, HEL1OS) from India's Aditya-L1 mission: historical retrieval, time-series feature engineering and a mission-control dashboard.

Stack: Python, time-series analysis, AI/ML, data visualization

The Knight — 2D platformer `COMPLETED`

- Unity / C# platformer covering player movement, collision handling and level design.

MBBS AI Study Assistant `IN DEVELOPMENT`

- RAG study platform for medical students; planned document Q&A, AI tutor and flashcards.

03 ACHIEVEMENTS

- **Best Performing Team** — SIH 2026 IDE Bootcamp, Thiagarajar College of Engineering, Madurai (May 2026)
- **National Finalist** — Smart India Hackathon 2025, with SEISMORA
- **Participant** — Global Game Jam 2026, Kerala
- **10+ hackathons** — prototyping and pitching with teams under tight deadlines

04 LEADERSHIP & COMMUNITY

- **Moderator, TEDxRTC** — moderated sessions and coordinated speaker–audience conversation
- **Founder (in progress)** — game-development community for student builders

05 SKILLS

AI / ML	RAG, LLM integration, intent classification, vector search, data processing
Languages	Python, Java, JavaScript, TypeScript, C#
Web	React, Node.js, Express, FastAPI, Tailwind CSS
Data & Infra	ChromaDB, Redis, Docker, Git & GitHub, REST APIs
Immersive	Unity, AR / VR, Vuforia, ARCore / ARKit, Blender, 3D scanning
Learning	AI agents, computer vision, shaders
