About 5 projects (CGPA 9.04)

Who is Kaiuf?

Computer Science Engineering student specialising in AI & Machine Learning (CGPA 9.04) who learns by building. Experienced in retrieval-augmented generation, full-stack development and immersive tech; SIH 2025 national finalist, Best Performing Team at the SIH 2026 IDE Bootcamp, and a veteran of 10+ hackathons.

Projects

kaiuf › projects › rgu-ai-assistant

RGU AI Assistant — RAG university assistant — Prototype

- Built a conversational assistant that answers student queries from a structured institutional knowledge base using retrieval-augmented generation.
- Fixed retrieval contamination from short acronyms with an exact-match routing layer ahead of vector search, blending sparse (Fuse.js) and semantic (ChromaDB) retrieval.
- Added intent classification and routing, conversation-state management, and honest fallbacks when retrieval confidence is low.

TypeScript | Node.js | ChromaDB | Fuse.js | LLM APIs

kaiuf › projects › seismora

SEISMORA — portable soft-insert contouring device — SIH 2025 Finalist

- Co-developed a compact, portable device for contouring the soft inserts of 3D-printed prosthetic sockets; presented working prototypes at the SIH 2025 grand finale.

Assistive tech | Hardware prototyping | Product design | 3D printing

kaiuf › projects › jharkhand-safety-ar

Jharkhand Safety AR — AR / VR industrial safety training — SIH 2026 · Prototype

- Immersive safety-training system combining AR hazard identification, camera-based visual recognition and interactive VR scenarios.

Python | FastAPI | Computer vision | AR/VR

kaiuf › projects › aphelion-ai

Aphelion AI — space-weather intelligence platform — In development

- Modular pipeline analysing solar X-ray data (SoLEXS, HEL1OS) from India's Aditya-L1 mission: historical retrieval, time-series feature engineering and a mission-control dashboard.

Python | Time-series | AI/ML | Data visualization

kaiuf › projects › the-knight

The Knight — 2D platformer — Completed

- Unity / C# platformer covering player movement, collision handling and level design.

Unity | C#

Education

kaiuf › education

B.E. Computer Science & Engineering — Artificial Intelligence & Machine Learning

Rathinam Global Deemed to be University · CGPA 9.04 / 10

Kaiuf M

AI / ML engineer & creative technologist

Studying: B.E. CSE (AI & ML), Rathinam Global University

Based in: Coimbatore, India

Known for: RAG systems, hackathon prototypes

Achievements

- **Best Performing Team** — SIH 2026 IDE Bootcamp, Thiagarajar College of Engineering, Madurai (May 2026)
- **National Finalist** — Smart India Hackathon 2025, with SEISMORA
- **Participant** — Global Game Jam 2026, Kerala
- **10+ hackathons** — Prototyping and pitching under tight deadlines

Leadership & community

Moderator, TEDxRTC
Moderated sessions and coordinated speaker–audience conversation

Founder (in progress)
Game-development community for student builders

Skills

AI / ML
RAG, LLM integration, intent classification, vector search, data processing

Languages
Python, Java, JavaScript, TypeScript, C#

Web
React, Node.js, Express, FastAPI, Tailwind CSS

Data & Infra
ChromaDB, Redis, Docker, Git & GitHub, REST APIs

Immersive
Unity, AR / VR, Vuforia, ARCore / ARKit, Blender, 3D scanning

Learning
AI agents, computer vision, shaders
